Enterprise deployment of Zoom delivers a communication and collaboration system where flawless video, integrated audio, wireless content sharing, and instant chat is available to the entire school or district community. Zoom integrates with active directories, student information systems (SIS), and learning management systems (LMS) to provide a comprehensive solution.

Classroom, schoolwide, administrators, professional development teams, and teachers have never been so close to their conference rooms, classrooms, and virtual learners. Remote teacher observation, professional development training.

• Remote teacher observation, professional development training.
• Easy and convenient remote teacher observation for annual critique and feedback. Teachers and other staff may participate in professional development if they desire.

Remote parent-teacher conferences
Parents and teachers may join a meeting from anywhere, from another room or mobile device.

• Remotely parent-teacher conferences
• Parents and teachers may join a meeting from anywhere, from another room or mobile device.

Communicating across all classrooms
Broadcast live morning announcements with Zoom, or communicate instantly via video into all classrooms across the school and/or district.

• Communicating across all classrooms
• Broadcast live morning announcements with Zoom, or communicate instantly via video into all classrooms across the school and/or district.

Wireless sharing in the classroom or boardroom
Share your screen via Zoom Rooms’ wireless sharing or by joining a Zoom meeting. Teachers, students, and administrators may use their Chromebooks, mobile phones, tablets, and laptops to share and view documents, videos, etc.
